

## KOCO® Mask – Anti-microbial Reusable Face Mask, 3 ply (2-Pack)

KOCO® Mask is non-medical, reusable, triple-ply cotton face mask that filters out dusts, pollen, germs, and bacteria. Fabric is treated with a safe, non-toxic antimicrobial to further defend against bacteria. Antimicrobial treated fabric is very breathable and comfortable on the skin. It is washable and can be washed up to 20 times while still being antimicrobial. Available in White, Black or Grey. Suitable for ages 10-Adult. Package contains two (2) KOCO® Masks.

### Features

- Reusable cloth mask offers hi-tech protection from dusts, pollen and bacteria
- Antimicrobial treatment keeps germs out and lasts for the life of the mask
- Made of 95% soft cotton /5% spandex
- Breathable and comfortable on skin
- Retains efficiency and antibacterial properties through repeated washings (up to 20 washes)
- **Antimicrobial Treatment**  
KOCO® Mask's fabric has been antimicrobial treated as a further defense in not only bacteria, but in providing long-term control of any microbial growth that might otherwise occur on the fabric's surface. This non-allergenic, non-leaching, is safe and non-toxic, and will last for the life of the mask, given cleaning guidelines are followed.
- KOCO® Mask passes **AATCC TM100-2019** Laboratory testing (Intertek) on antibacterial activity and show >90% reduction of bacteria like *Staphylococcus aureus* (ATCC 6538) and *Klebsiella pneumoniae* (ATCC 4352).

- KOCO® Mask meets **STANDARD 100 by OEKO-TEX®** - one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

### **Disclaimer**

KOCO® Antimicrobial Reusable Face Mask is used for personal protection only and is not intended for medical uses. Please continue to practice social distancing, wash your hands and refrain from touching your face.

### **Care Instructions**

- It is recommended that KOCO® masks be hand laundered using a non-allergenic laundry detergent, then air dried before wearing.
- Do NOT use dishwashing detergent, as many contain natural or synthetic bleach that can fade the mask and possibly negate the mask's antimicrobial defense.
- To ensure that the antimicrobial integrity of the mask is preserved, do NOT dry clean, and avoid the use of chlorine bleaches.
